Product information concerning Per- and Polyfluoroalkyl Substances (PFAS) in HAHN products

Dear Ladies and Gentlemen,
during manufacture of the various HAHN products, Per- and Polyfluoroalkyl substances (PFAS) will be used in accordance with the definition in Annex XV restriction proposal of 22. March 2023 (Annex XV restriction report - see link) will not be used as raw materials.

Based on the information provided by our raw-material suppliers and knowledge of the composition of our end products, we do not add new Perfluoroalkyl and Polyfluoroalkyl (PFAS) Substances to the products listed above.

To note:

Many of these Per- and Polyfluoroalkyl substances are found everywhere. Checking HAHN products for the presence of these substances is not part of our ongoing production and quality control.

This declaration refers to the current HAHN-product range.

As HAHN GmbH & Co. KG is currently in the process of interviewing relevant suppliers for potential raw materials containing PFAS, this document may be subject to change. We therefore recommend that you regularly visit our homepage (www.hahn-trafo.com) for updated documents.

Please note that our products are industrial products that may contain traces of unknown contaminants (from the raw materials used or from the manufacturing process itself).

In view of the many factors that may influence the processing and use of our products, this information does not exempt processors from their own examinations and tests. It is your responsibility to ensure that any protection rights, existing laws and regulations are complied with.
